

**Listing of Claims:**

1-32. (previously canceled)

33. (currently amended) A page for displaying planar objects comprising:  
a rectangular center sheet having a top, a bottom, a front, a back, and two sides;  
transparent, thermoplastic film on the front and the back of the center sheet and  
immediately adjacent to the top, bottom, and a first side of the center sheet;  
a plurality of pairs of spaced-apart, film-to-film seals joining the film through cutout  
openings in the center sheet at locations selected for supporting planar objects between the  
film on the front of the center sheet and the center sheet, and between the film on the back of  
the center sheet and the center sheet; and wherein

a first of the plurality of pairs includes at least one of the cut-out openings being T-  
shaped and having a top of the T and a base of the T, the top of the T lying along the first side  
of the center sheet and the base of the T extending toward the other side of the center sheet,  
and a separate cut-out opening being spaced apart from, but linearly arranged, with respect to  
the base of the T-shaped opening, film-to-film seals formed in both the separate opening and  
in the base of the T-shaped opening to support the a bottom edge of a planar object to be  
displayed.

34. (previously presented) The page of claim 33, wherein the center sheet is a  
paper sheet.

35. (currently amended) The page of claim 33, further including a second of the  
plurality of pairs at least one additional set of spaced-apart film-to-film seals arranged in a  
line parallel to the linearly arranged first pair of film-to-film seals formed in the separate  
opening and in the base of the T-shaped opening.

36. (currently amended) The page of claim 35, wherein the second of the plurality of pairs includes a T-shaped opening and a separate cut-out opening, wherein the two T-shaped openings are formed in the center sheet and the corresponding separate cut-out openings are provided in the center sheet and are spaced-apart from, but are linearly arranged with respect to, the bases of the two T-shaped openings, film-to-film seals formed in the separate openings and in the two bases of the two T-shaped openings to provide two parallel supports for the bottom edges of two planar objects to be displayed.

37. (previously presented) The page of claim 33, wherein at least two spaced-apart cut-out openings are provided at the top and at the bottom of the center sheet, and film-to-film seals are formed at each of the top and bottom cut-out openings.

38. (previously presented) The page of claim 33, including at least one cut in the center sheet to provide support for an edge of a planar object to be displayed.

39. (currently amended) The page of claim 33, further including a rectangular planar object which has a width greater than the distance between the a spaced-apart bottom edge supporting film-to-film seals.

40. (previously presented) A page for displaying planar objects comprising: a rectangular center sheet having a top, a bottom, a front, a back, and two sides; transparent, thermoplastic film on the front and the back of the center sheet and immediately adjacent to the top, bottom, and a first side of the center sheet; a plurality of pairs of spaced-apart, film-to-film seals joining the film through cut-out openings in the center sheet at locations selected for supporting planar objects between the film on the front of the center sheet and the center sheet, and between the film on the back of the center sheet and the center sheet; and

at least one cut in the center sheet to provide support for an edge of a planar object to be displayed.

41. (previously presented) The page of claim 40, wherein the cut creates a tab in the center sheet.

42. (previously presented) The page of claim 40, wherein the pairs of spaced-apart film-to-film seals are in a line which is parallel to the top and bottom of the center sheet.

43. (previously presented) The page of claim 40, wherein the center sheet is a paper sheet.

44. (previously presented) The page of claim 40, wherein at least two, spaced-apart, cut-out openings are provided at the top and at the bottom of the center sheet, and film-to-film seals are formed at each of the top and bottom cut-out openings.

45. (previously presented) The page of claim 40, further including a rectangular planar object which has a width greater than the distance between the spaced-apart bottom edge supporting film-to-film seals.

46. (currently amended) A page for displaying planar objects comprising:  
a rectangular center sheet having a top, a bottom, a front, a back, a first side, and a  
second side;  
at least two holes adjacent the second side arranged for holding the page in an album  
transparent, thermoplastic film on the front and the back of the center sheet and  
immediately adjacent the top, bottom, and the first side of the center sheet;  
a memo area located between the first and second sides of the center sheet;  
the center sheet including having a portion beneath the thermoplastic film having a  
contrasting underlying pattern to with a visual appearance which is different from the visual  
appearance of the memo area; and  
a plurality of pairs of spaced-apart, film-to-film seals joining the film through cut-out  
openings in the center sheet at locations selected for supporting planar objects between the  
film on the front of the center sheet and the center sheet, and between the film on the back of  
the center sheet and the center sheet.

47. (previously presented) The page of claim 46, wherein the portion of center  
sheet beneath the thermoplastic film is darker in visual appearance than the memo area.

48. (previously presented) The page of claim 47, wherein the memo area is  
substantially white and includes lines.

49. (previously presented) The page of claim 46, wherein the center sheet is a  
paper sheet.

50. (previously presented) The page of claim 46, wherein at least two spaced-  
apart, cut-out openings are provided at the top and at the bottom of the center sheet, and film-  
to-film seals are formed at each of the top and bottom cut-out openings.

51. (previously presented) The page of claim 46, including at least one cut in the  
center sheet to provide support for an edge of a planar object to be displayed.

52. (previously presented) The page of claim 51, wherein the cut creates a tab in the center sheet.

53. (previously presented) The page of claim 46, wherein the memo area extends from the top to the bottom on the front of the center sheet and the back of the center sheet, and wherein a vertical portion immediately adjacent to the memo area has a visual appearance substantially similar to that of the portion beneath the thermoplastic film.

54. (previously presented) A page for displaying planar objects comprising:  
a center sheet having a front and a back;  
transparent film on the front and back of the center sheet;  
at least one film-to-film seal joining the film through a cut-out opening for each seal  
in the center sheet, each seal being at a location for supporting a planar object between the  
film on the front of the center sheet and the center sheet, and between the film on the back of  
the center sheet and the center sheet; and  
at least one of the cut-out openings being T-shaped and having a top of the T and a  
base of the T, and a film-to-film seal formed in the base of the T-shaped opening to support a  
planar object to be displayed.

55. (previously presented) The page of claim 54, wherein the center sheet is a  
paper sheet.

56. (previously presented) The page of claim 55, wherein at least one additional  
film-to-film seal is formed on the page and is arranged in a line parallel to the base of the T-  
shaped opening.

57. (previously presented) The page of claim 54, wherein a separate cut out  
opening is spaced apart from, and is linearly arranged with respect to, the base of the T-  
shaped opening, and a film-to-film seal is also formed in the separate opening.

58. (previously presented) The page of claim 54, including two of said T-shaped  
openings, and wherein film-to-film seals are formed in the bases of the two T-shaped  
openings, the two bases of the T-shaped openings being parallel to each other to provide  
support for the bottom edges of two planar objects to be displayed.

59. (previously presented) A page for displaying planar objects comprising:  
a center sheet having a front and a back;  
transparent film on the front and back of the center sheet;  
at least one film-to-film seal joining the film through a cut-out opening for each seal  
in the center sheet, each seal being at a location selected for supporting a planar object  
between the film on the front of the center sheet and the center sheet, and between the film on  
the back of the center sheet and the center sheet; and  
at least one cut in the center sheet to provide support for an edge of a planar object to  
be displayed.

60. (previously presented) The page of claim 59, wherein the cut creates a tab in  
the center sheet.

61. (previously presented) The page of claim 59, including two elongated, film-  
to-film seals which are parallel to each other.

62. (previously presented) The page of claim 59, wherein the center sheet is a  
paper sheet.

63. (currently amended) A page for displaying planar objects comprising:

a center sheet having a front and a back;

transparent film on a portion of the front and the back of the center sheet;

memo areas located on each of the front and the back of the center sheet;

the center sheet including having a portion beneath the thermoplastic film having a contrasting underlying pattern to with a visual appearance which is different from the visual appearance of the memo area; and

a plurality of pairs of spaced-apart, film-to-film seals joining the film through cut-out openings in the center sheet at locations selected for supporting planar objects between the film on the front of the center sheet and the center sheet, and between the film on the back of the center sheet and the center sheet.

64. (previously presented) The page of claim 63, wherein the center sheet beneath the thermoplastic film is darker in visual appearance than the memo area.

65. (previously presented) The page of claim 64, wherein the memo area is substantially white and includes lines.

66. (previously presented) The page of claim 63, wherein the center sheet is a paper sheet.

67. (previously presented) The page of claim 63, including at least one cut in the center sheet to provide support for an edge of a planar object to be displayed.

68. (previously presented) The page of claim 67, wherein the cut creates a tab in the center sheet.
